

NOMAN RAUF

Associate AI/ML Engineer

Lahore, Pakistan | +92 304-4650036 | tensorflownoman@gmail.com | github.com/numan-developer-2

PROFESSIONAL SUMMARY

AI Developer with 5 months of production experience specializing in Prompt Engineering, LLM applications, NLP pipelines, and AI automation tools for international projects. Currently designing and deploying AI-powered products at DigitalFlux using Claude, OpenAI, LangChain, and LangGraph. Previously built enterprise RAG system and LLM-powered applications at NETSOL Technologies. Delivered AI products for local and international freelance clients — chatbots, automation workflows, and document intelligence systems. Available onsite in Lahore (3PM–12AM shift).

EDUCATION

BS Computer Science — NCBA&E, Lahore

Completed: March 2026

Coursework: Machine Learning · Deep Learning · NLP · Computer Vision · OOP · Data Structures & Algorithms · DBMS · Software Engineering

TECHNICAL SKILLS

Prompt Engineering: System prompt design, prompt optimization, prompt versioning, few-shot prompting, chain-of-thought, structured outputs, agent skill libraries, evaluation pipelines

LLMs & AI Tools: Claude API, OpenAI GPT-4, Gemini, DeepSeek — LLM application development, function calling, AI agents, agentic pipelines, automation workflows

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS — AI-powered frontend development using Claude Code and GitHub Copilot/Codex for rapid UI building

NLP: LangChain, LangGraph, NLP Embeddings, Text Classification, NER, Sentiment Analysis, Multilingual NLP, Hugging Face Transformers, OCR, document intelligence

RAG & Vector DBs: FAISS, ChromaDB, BM25, hybrid retrieval, semantic search, chunking, re-ranking, hallucination-guard

AI Automation: n8n workflows, chatbot development, WhatsApp/Telegram bots, business process automation, AI product development for international clients

Backend & Deployment: Python, FastAPI, Flask, REST APIs, Docker, Git, GitHub, AWS (EC2, S3), GCP, PostgreSQL, MongoDB

ML & Deep Learning: Scikit-learn, TensorFlow, PyTorch, XGBoost, YOLOv8, OpenCV, CNNs, LSTMs, Transformers

WORK EXPERIENCE

AI Prompt Engineer

Jul 2025 – Present

DigitalFlux | Remote

- Design, optimize, and deploy AI-powered applications for international projects using Claude, OpenAI, LangChain, and LangGraph — specializing in prompt engineering, LLM orchestration, and AI automation tools.
- Build React and Next.js frontends for AI products using Claude Code and Codex — rapid UI development, API integration, and production deployment for real client products.
- Develop NLP pipelines and AI automation workflows for international clients — chatbots, document intelligence, multilingual text processing, and business process automation.

AI/ML Engineer Intern

Jan 2026 – Jun 2026

NETSOL Technologies – NIAI | Lahore

- Engineered enterprise RAG system with LangChain, LangGraph, FAISS, ChromaDB — prompt engineering for hallucination-guard, re-ranking, and source-cited LLM responses; deployed FastAPI backend on AWS.
- Developed LLM-powered applications using OpenAI GPT-4 and Gemini — designed optimized prompt workflows, function calling specs, and structured outputs for AI automation in international business workflows.
- Applied NLP techniques (text classification, multilingual embeddings, NER) and trained deep learning models (LSTM, CNNs) — full pipeline from data preprocessing to production deployment.

Freelance AI Developer

2024 – 2025

International & Local Clients | Remote

- Built and deployed AI products for international and local clients — LLM-powered ordering chatbot, medical report assistant, gym automation agent, and customer service bot using Claude, OpenAI, LangChain, and React/Next.js frontends.
- Managed complete AI product development: requirement gathering, prompt design, NLP pipeline development, frontend + backend delivery, and client handover for international projects.

Python Developer Intern

Aug 2025 – Nov 2025

Unisoftware Company | Lahore

- Built Python backend APIs (FastAPI), trained 5+ ML models; implemented NLP and computer vision modules across 3+ AI use cases with full documentation.

KEY PROJECTS

RAG-NetsolCompany — Enterprise LLM System (Production, International) Python · LangChain · LangGraph · FAISS · ChromaDB · OpenAI · FastAPI · Next.js · AWS

- Production LLM system with optimized prompt engineering — hallucination-guard prompts, re-ranking, source-cited Q&A across 35,000+ indexed chunks; Next.js frontend built with Claude Code; deployed on AWS.

AI Automation Suite — International Freelance Products Python · Claude · OpenAI · LangChain · FastAPI · React · Next.js · NLP · WhatsApp API

- Built 4 AI products for international and local clients — LLM chatbots, NLP automation pipelines, and document intelligence systems with React/Next.js frontends; all deployed and serving real users.

MediReport AI — International Healthcare AI Platform Python · FastAPI · OCR · Hugging Face · Multilingual NLP · MongoDB · Next.js · Vercel

- International-facing AI healthcare SaaS — OCR document intelligence, LLM summarization, multilingual NLP (Urdu, Hindi, Arabic, English); Next.js frontend on Vercel, B2B API serving global clients.

Invigilio AI — Production AI SaaS (Co-Founder, FYP) Python · YOLOv8 · OpenCV · FastAPI · Next.js 14 · Docker · AWS

- Co-founded and shipped production AI SaaS — YOLOv8 (mAP50: 0.921), Next.js 14 dashboard built with Claude Code, FastAPI on AWS, serving real industrial clients.

CERTIFICATIONS

Prompt Engineering — High Tech (2024) · Generative AI with LLMs — DeepLearning.AI/Coursera · AI/ML Engineering — Unisoftware (2025) · Python for Data Science — Google (2024)
